

# Heading Examples

This is the first heading button, the one with the blue line all the way down the icon. Since it is the first heading, it is a level one heading.

## This is Too

If you click on it again, you get another heading on the same level.

## This is the Next Button

This moves down on level.

## Another Level Two Heading

To create another heading on the same level, use the button. This is different from MS Office where you would click on the lvl 2 button.

## The Next Level

The level down button moves one level down again. This time to level 3. This Wiki is set up for three levels.
